HOLIDAY FETES HERE ATTRACTED HUGE CROWDS

The weather man acted kindly toward Blaimore on July the first, giving splendid opportunities for carrying out the eighty-odd events on the programme, which proved a drawing card for thousands from all points between Medicine Hat, Calgary and Cranbrook. Gate receipts exceeded anticipations to the extent of one hundred dollars, while it was estimated that never before were so many cars located in the vicinity of the big stadium.

All events were pulled off without a hitch, and keen competition seemed to be the order of the day.

Winners in the various major events were as follows:

Two-and-a-half-mile — marathon—J. Mottl, Beaver Mines, first; James Patterson, Blaimore, second.

Junior mile bicycle race—A. Bonin, Michel; J. Redford and Clifford Chappel, second and third.

100-yard dash—J. Connick, Fernie; first; G. Hamilton, Lethbridge, second; G. Walker, Lethbridge, third.

220-yards—Hamilton, first; Connick, second; Walker, third.

Five-mile race—Jerome Platt, Brant, first; Arthur Fournier, Passburg, second; C. Conner, Bellevue, third. Platt's time, 27 minutes and 51 seconds.

Half-mile open—Jerome Platt, first; Johnny Kerr, Bellevue, second; Battel, Blaimore, third. Platt's time, 2 minutes and fourteen seconds (12 seconds under the Alberta record).

One-mile open—J. Kerr, first; J. Conners, second.

440-yard dash—Walker, first; Hamilton, second; Causey, Michel, third.

Junior girls high jump—Frances Cosstick, Bellevue, 4 feet and seven inches.

Boys' running high jump—H. M. LeRoy, Michel, 5 feet 1 1/2 inches.

Shot put (8-pound)—Alex. Cosstick, Bellevue, 35 feet 5 1/2 inches.

Football—Corbin.

Softball—Blaimore Vagabonds.

A refreshment booth, operated on the grounds by the Ladies' Aid of the United church, was well patronized.

Dances were held in the Columbus hall on Friday and Saturday nights, with large crowds of young (and old) people attending. In fact the hall was crowded to overflowing on Saturday night, and all were loud in praise of the excellent music supplied by the local orchestra, the Band-It.

The finance committee report that after meeting a deficit of close to \$150 from last year, and paying all expenses this time, they will have a small sum remaining in the treasury.

STANMORE-BURRILL GO AT COLEMAN SATURDAY NIGHT

Jim Stanmore, of Lethbridge, has accepted the challenge of Jimmy Burrill, of Blaimore, to box anyone whom the Pass towns could produce. In accepting the challenge Stanmore states: "I am anxious to meet Burrill or any other lightweight whom Pass promoters care to select, anywhere or at any time."

Recent victories to Stanmore's credit include a technical knock-out over Floyd Wright at Milk River, and a six-round draw against Calahan, of Calgary.

The match between Stanmore and Burrill will be staged in the Coleman arena on Saturday, July 8, under the auspices of Coleman Athletic Association and the Canadian Legion.

Stanmore is 136 and Burrill 138 pounds, and the fight is scheduled for ten rounds.

The semi-final will see another Lethbridge boy in action, Dave Hyslop, against Bill Russell, of Coleman, their respective weights being 163 and 165 pounds.

Preliminaries include Tony DeCecco, of Coleman, and Joe Stella, of

BLAIRMORE PUBLIC LIBRARY

NOTICE—The library will be closed from July 15th until August 31st. All members having books due on dates between now and July 15th please have them returned on or before that date.

The library hours are Tuesday, Thursday and Saturdays from 7 to 9 p.m. The fees are \$1.00 for residents and \$2.00 for non-residents per year.

CHANGE OF HOUR OF SERVICE

The members and friends of the Central United church will keep in mind the fact that during the month of July the services will be at 11 a.m. On Sunday morning, July 9th, the Sacrament of the Lord's Supper will be administered.

FERNIE LADIES

BEAT BLAIRMORE

Blaimore ladies journeyed to Fernie Saturday afternoon to play golf against the Fernie ladies' club. The visiting team lost most of the four-holes in the morning but did not come out as badly in the singles in the afternoon.

Mrs. Dufour won a Fernie ladies' competition in the afternoon, taking low net, while Miss Ferguson had the least number of putts on the greens.

The visitors were guests of the Fernie club at luncheon at the Northern hotel.

After the playing in the afternoon, tea was served in the clubhouse, Mrs. J. Marshall convening. Miss Seymour, Miss George McKenzie and Mrs. Mercer were assistants.

The result of the competition was as follows:

Mrs. Lawes and Miss Ellen Hughes, of Fernie, won from Bobby Cruickshank and Mr. W. Turner, of Blaimore.

Mrs. Irvine and Miss M. Kastner, of Fernie, tied with Miss Sellen and Mr. Kerr, of Blaimore.

Mrs. Stewart and Mrs. Connick, of Fernie, won from Mrs. Turner and Mrs. Thompson, of Blaimore.

Miss M. Brown and Mrs. Herchmer, of Fernie, won from Mrs. Farmer and Mrs. Granger, of Blaimore.

Mrs. Kelman and Mrs. Kastner, of Fernie, won from Mrs. Passmore and Mrs. Thornton, of Blaimore.

Mrs. Pepper and Mrs. Wallace, of Fernie, won from Mrs. Blake and Mrs. Cruickshank, of Blaimore.

Mrs. Lawes lost to Bobby Cruickshank, of Blaimore, and Miss Ellen Hughes, of Fernie, to Mr. W. Turner, of Blaimore.

Mrs. Irvine won from Miss Sellen, Blaimore; Miss Kastner tied with Mrs. Kerr; Mrs. Stewart won from Mrs. Turner; Mrs. Connick won from Mrs. Farmer; Mrs. Herchmer tied with Mrs. Thompson; Miss M. Brown won from Mrs. Granger; Mrs. Kelman won from Mrs. Passmore; Mrs. Kastner tied with Mrs. Thornton; Mrs. Pepper won from Mrs. Blake; Mrs. Wallace won from Mrs. Cruickshank. — Fernie Free Press.

SPECIAL EXCURSIONS POPULAR

Montreal, July 3.—A train of coaches nearly 50 miles in length would be required to handle the throng of passengers handled by the two principal Canadian railways on their low-rate week-end excursions since these cheap trips were resumed in February 1933, it was stated recently.

The low-rate excursions, taken up somewhat timorously by the Canadian railways in February, 1933, had resulted in bringing large numbers of people back to train travel. The Canadian National and Canadian Pacific railways had operated in all 467 excursions between points in Canada February, 1932, and the end of May, 1933, and the fares for these journeys had been one cent a mile, and even less for long distances. Between them the railways had handled more than 330,000 passengers on these excursions, with a combined revenue amounting to something like \$900,000. Between Montreal and Toronto, ten excursions had carried some 35,000 excursionists during the period.

Incurable Patients

Old Question Of Euthanasia Discussed By American Physicians

Delegates attending the American Institute of Homoeopathy heard two doctors debate the question:

"Should physicians be given the legal right to dispose of incurable patients?"

Speaking in favor of euthanasia or medical-legal death, Dr. W. A. Guild of Chicago cited the case of a child monstrously saved from death at birth after six weeks of care.

He suggested a special court of humanitarians to hear and grant pleas of persons who wish to die. This idea was opposed by Dr. Almon C. Tenney, also of Chicago, who said legalized euthanasia would be abused.

Many Musicians Took Part

Largest Military Band Played At Aldershot Tattoo

The largest military band in the world took part in the tattoo held recently at Aldershot. It was part of the great army pageant played by 5,000 soldier actors in the Rushmore Valley before an audience of 50,000 children who came to Aldershot from London and all parts of the home counties. An army officer who knew all the behind-the-scenes secrets of the tattoo remarked: "There is nothing to touch that living carpet of massed bands. There are 41 bands, 37 bandmasters, 14 drum-majors, including the tallest in the British army who stands six feet two inches in his bonnet—altogether 849 musicians."

The bodice has become a surprise collar that winds about the waist and lies in a pretty girlish bow at the back. The short sleeves have just the right puff. The pattern also provides for long sleeves.

The skirt is straight and slender; slightly flared toward the hem. This darling affair is so easy to make, the skirt being in two sections. And you will be surprised at its small cost!

Gray crepe print made the original. The cunning collar is white crepe. Another idea for the collar is white organdy.

Plain crepe silk, batiste print (particularly in polka dots), then in plain or gray stripes, chiffon cotton voile prints, etc., are seasonable and delightful.

Style No. 722 is designed for sizes 14, 16, 18, 20 years, 36, 38 and 40 inches bust. Size 40 requires 3½ yards of 38-inch material with 1½ yards of 35-inch contrasting.

Price of pattern 20 cents in stamps or coin (coin is preferred). Wrap copy carefully.

Thief Had Expensive Tastes

Took Only Valuable Articles From New York Tobacco Shop

A slender thief with an expensive taste in smokers' equipment made his way through two transoms and into the retail tobacco shop of Alfred Dunhill, of London, Inc., 514 Fifth Avenue, New York, where he looted thirty show-cases and carried off jewelry, cigar lighters, clocks and pipes valued at nearly \$25,000. There were two noteworthy things about the intruder, he was small and agile enough to pass through a pair of apertures no more than twelve inches high. He was discerning enough to ignore articles of silver. Nearly all the cigarette and vanity cases he selected were gold, and he took pipes only from the Grade A rack, where prices range from \$50 to \$65.

Explanations and Comments

The Division Of Canaan, verses 1-5. The land of Canaan was divided among the twelve tribes whose four founders were the two sons of Joseph (Ephraim and Manasseh) and the other sons of Jacob, Levi excepted. The tribe of Levi was set apart for the services of the priesthood. "This is Joshua's; this is Simeon's; and this is Benjamin's," they said, even while the Amorites, the Jebusites, and the Hittites were in open possession. "The division made was the announcement in faith of certain high ideals which under God's guidance they proposed to realize by the long and patient struggle which followed."

"As for the dull-eyed, humdrum people whose aspirations never get a rod in advance of their present achievements! Unless we perpetually see visions and dream dreams, we shall never have the moral vigor, the spiritual insight for winning a land of promise. It is in what we see by the eye of faith and confidently wait for that kindles our hearts to undertake the high tasks of life." — C. R. Brown.

Caleb's Claim, verses 6-12. Caleb came to Joshua with a claim in which he was supported by the rest of the tribe of Judah. Caleb is called here the Kenizite, a name given the Edomite tribe in Genesis 15:18; but Caleb's younger brother, Othniel, who after Joshua became the first of the Judges, is called "the son of Kenaz," and it may have been his name. Caleb, a member of the tribe of Judah, that the word Kenizite was derived. Caleb reminded Joshua of the promise made him when he returned to Kadesh-Barnea with the other spies, when he had had the courage of his convictions, and had brought back a sincere report urging the immediate conquest of Canaan. To that record of courageous faithfulness he could now add that he had wholly followed Jehovah his God.

But what to have pleasant memories of the past; are you sowing pleasant memories now? Just as surely as health in the past, so does peace of mind in old age depend on records engraved on the memory during youth and manhood. Parker looked back on his life and said: "I have fought a good fight; I have finished my course; I have kept the faith." And then he looked forward and said, "Henceforth there is laid up for me a crown of righteousness."

Recipes For This Week

(By Betty Barclay)

GRAPE-NUTS RAISIN PIE

¾ cup grape-nuts.
¾ cup raisins, chopped.
1½ cups brown sugar.
2½ cups hot water.
¾ cup cider vinegar.
3 tablespoons butter.

Line a 9-inch pie tin with paste rolled to ¼-inch thickness. Combine ingredients in order named and cook 10 minutes. Cool and pour into pie tin. Roll remaining paste to ¼-inch thickness, cut into ½-inch strips, and place ¼ inch apart over top of pie to form lattice top. With sharp knife, trim off surplus paste, moisten rim with cold water, place ¼-inch strip paste around it, and press edges together with fork dipped in flour. Bake in hot oven (425 degrees Fahrenheit) 15 minutes, then reduce temperature to moderate oven (375 degrees Fahrenheit). Continue baking 25 minutes, or until pie is delicate brown.

ORANGE MALTED MILK

(Serves 1)
1 tablespoon malted milk powder.
¾ cup boiling water.
¾ cup cold water.
2 tablespoons orange juice.
Cracked ice.
Mix malted milk powder with boiling water to make a smooth paste. Add cold water and orange juice, strain over cracked ice into glass.

Pioneer Steamship Company

Cunard Line Celebrates 93rd Anniversary Of Its Inception

This year the Cunard Line will celebrate its 93rd anniversary by sending the "Aquitania" to Halifax. Nova Scotia, the ship's port of call, by a Cunard ship in America in the first year of its trans-Atlantic life, in 1840. The occasion will feature a week-end cruise to the Nova Scotia port.

The Cunard Line's birthday, like that of the United States, falls on the Fourth of July, the first ship of the Line, the "Britannia," leaving Liverpool, England, on that date in 1840, and calling at Halifax and Boston 93 years ago.

The Cunard Line is the oldest trans-Atlantic steamship company, in fact, the first to operate across the Atlantic on a regular schedule. Previous to the regular sailings of the "Britannia," other steamships had crossed the ocean, but their voyages were entirely in the line of experiments. The Cunard Line started to run on a weekly schedule in 1840.

The first ship to cross the ocean weekly was built in New York City. She sailed from the Georgia city for which she was named, on May 25th, 1819, arriving in Liverpool on June 29th, 93 years later. She did not rely solely upon her paddle-wheels; in fact, she trusted in the sails, being under steam for less than 100 hours.

Twelve years later, the first "Royal Warrant" made the Cunard Line a trans-Atlantic voyage under steam.

No further steam venture was made until April 4th, 1838, when the "Sirius" left London, England, for New York with 94 passengers aboard. She was followed from Bristol four days later by the "Great Western," the first steam vessel specially built for the Atlantic passage. The "Great Western" made the trip in 15 days, two days less than the "Sirius," and arrived with 200 tons of coal left in her bunkers. The result was regarded as wonderful.

Samuel Cunard was a close observer of all these happenings. Living at the time in Halifax, he had acquired several sailing vessels, in which he carried mail between Newfoundland, Boston and Bermuda. During the year 1838 the British Government had sent out circulars inviting bids for a faster and more reliable service for the postal matter by steam vessels. One of these circulars found its way into the hands of Mr. Cunard (later Sir Samuel), and he concluded that here was his hidden opportunity.

Unable to raise necessary capital in Halifax, Cunard sailed for England. He was now 50 years old. He received but little sympathy in London, but he had a letter of introduction to Robert Napier, a ship-builder on the Clyde, he went on to Glasgow, where he was welcomed by Mr. Cunard and introduced him to the two ablest shipping men in Great Britain—George Burns of Glasgow, Scotland, and David MacIver, of Liverpool, England. Between these two, Cunard found the capital was subscribed and Mr. Cunard was in a position to submit a tender for the service. He did so every two weeks between Liverpool, Halifax, and Boston.

This tender was lower than that made by the owners of the "Great Western." Mr. Cunard's principal rivals, was accepted and a contract for seven years was let to the New American Steam Packet Company, the original name of the Cunard Line.

To carry on this trade, plans for four steamers, the "Britannia," "Calcutta," "Caledonia," were drawn up and accepted during 1839, and the ships were launched early the next year, 1840.

The "Britannia," with 64 passengers, started on her maiden voyage from Liverpool to Boston on May 4th, 1840, and arrived in Boston 14 days and 8 hours later, including a stop at Halifax, considered at the time a rapid passage.

The mail-service grew to such an extent that the "Hibernia" was added in 1843, and the "Cambria" in 1845.

In 1847, when the company's first mail contract had expired a new contract was entered into with the Cunard Line and provided for weekly sailings from Liverpool to New York and Boston.

More ships followed, all being built of wood, but with no radical departure from the "Britannia" until the year 1852, when the iron screw steamer "Australia" and three sister ships were built.

The company's first steel liner was the "Severn," built in 1881. She was the first Cunard to be fitted with electricity. She was superbly fitted for those days, her main deck accommodation for 400 cabin and 700 third class passengers.

The "Campania" and "Lucania," built in 1892, were among the first big ships, registering 13,000 tons. Both were fast, the "Lucania" making the westward crossing from Queenstown in five days, seven hours, and twenty-three minutes. It was on this ship that Marconi experimented with and first introduced wireless telegraphy.

New quadruple propellers speed the Cunard Line's big three—the "Berengaria," "Aquitania," and "Campania"—through the seas.

Thus the history of the Cunard Line has to a great extent been the history of shipping, beginning with the wooden side-wheelers followed by the iron ship, then the triple and quadruple screws, and all built and propelled in the interest of the speedy transportation of mails between Great Britain and America.

Samuel Cunard was knighted in 1898 because of his outstanding service in the Crimean War. He died in London, England, in 1894, in his 78th year.

Coal Subsidy

One-Seventh Of A Cent A Mile On Coal Shipped From Saskatchewan Lignite Fields

Subsidy of one-seventh of a cent a mile on coal shipped from Saskatchewan lignite fields to points in Manitoba and as far east as Sioux Lookout, has been made effective by federal order-in-council.

Word of the passage of the order-in-council providing for a subsidy of one-seventh of a cent a mile, but not to exceed in any case a total of 40 cents a ton was received recently by officials of the Saskatchewan department of railways, labor and industries.

The freight concession will apply only on lignite coal shipped out of Saskatchewan to Manitoba and western Ontario points for industrial purposes only, and will not apply to anything under carload lots.

The concession will be accorded only to mines established before December, 1931.

The rate concession will place Saskatchewan mines in a favored position in competition with coal from American mining fields for distribution in Manitoba.

The order-in-council provides for the freight concession being actually paid to the railways by the government, the adjustment to be made direct to the mine operators.

Ban On Socialists

Germany's Social Democratic Party Has Ceased To Exist

Germany's Social Democratic party, once the leader of Socialists the world over and the winner of the 1918 revolution, has ceased to exist as a political organization. Chancellor Hitler's heavy hand, which first fell upon the Communists, has now descended upon the party which long was the leading one and was regarded as an impregnable bulwark of the post-war republic.

All speeches in recent days by Nazi leaders indicate the Hitler movement intends to claim 100 per cent. power in Germany.

A serious blow was dealt to department and chain stores in an order issued by Chancellor Hitler's commissar for business, Otto Wagener.

Department and chain stores were forbidden to maintain barber and beauty shops, photographic studios, hairdressing salons, shoe repair, tailoring, dressmaking, watch repair and optical shops, automobile and bicycle repair shops, circulating libraries, banking and money exchange offices and furniture factories.

Secret police suspected for one week the National Deutsche Zeitung, one of whose editors is a nephew of Dr. Hugenberg.

Mechanism Of The Ear

Little Is Known As To How Ear Sound Is Conveyed To The Brain

The mechanism of the human ear has been known during long ages, but the manner in which it conveys definite information to the brain is another matter. The world is still far from a final pronouncement, however, from Liverpool to Boston on May 4th, 1840, and arrived in Boston 14 days and 8 hours later, including a stop at Halifax, considered at the time a rapid passage.

The time-service grew to such an extent that the "Hibernia" was added in 1843, and the "Cambria" in 1845.

In 1847, when the company's first mail contract had expired a new contract was entered into with the Cunard Line and provided for weekly sailings from Liverpool to New York and Boston.

More ships followed, all being built of wood, but with no radical departure from the "Britannia" until the year 1852, when the iron screw steamer "Australia" and three sister ships were built.

The company's first steel liner was the "Severn," built in 1881. She was the first Cunard to be fitted with electricity. She was superbly fitted for those days, her main deck accommodation for 400 cabin and 700 third class passengers.

The "Campania" and "Lucania," built in 1892, were among the first big ships, registering 13,000 tons. Both were fast, the "Lucania" making the westward crossing from Queenstown in five days, seven hours, and twenty-three minutes. It was on this ship that Marconi experimented with and first introduced wireless telegraphy.

New quadruple propellers speed the Cunard Line's big three—the "Berengaria," "Aquitania," and "Campania"—through the seas.

Thus the history of the Cunard Line has to a great extent been the history of shipping, beginning with the wooden side-wheelers followed by the iron ship, then the triple and quadruple screws, and all built and propelled in the interest of the speedy transportation of mails between Great Britain and America.

Samuel Cunard was knighted in 1898 because of his outstanding service in the Crimean War. He died in London, England, in 1894, in his 78th year.

IMPORTANT LAW POINT

It may not be known that, according to the English law, a will made before marriage is revoked on the death of the testator and the estate administered as if the testator died intestate. The English law prevails, except in Alberta, provided the will was made in contemplation of marriage. If not so, then the will is revoked.

An instance of the kind has occurred in the case of the will of the late James Ernest Duce, of Cardston, who died on May 17, 1933. The deceased had made a second marriage on December 20, 1932, an left a will dated November 4, 1930. This will was made before the second marriage and not in contemplation of marriage. It therefore is revoked.

With the wish and consent of the widow, power of attorney for administering the estate of the late James Ernest Duce has been given to the two brothers of the deceased, who will administer it under the provisions of the Intestate act.

LEGISLATOR IS SARCASTIC

In the United States they blame the railroad lobby for a lot of legislation the motorist finds hard to bear. Perhaps it was inevitable there should be retaliation. At any rate, a member of the Michigan Legislature has introduced a Bill that puts the shoe on the other foot. The Bill, which is, of course, a joke, provides that: "No railroad shall operate any train without first obtaining a certificate of necessity and convenience on each day of its operation; trains must be appropriately decorated on all holiday days, decorations to include at least one stuffed eagle, broken carrying a bell and lantern must precede each train across a public highway; whistles must be tuned accurately in the key of C; lifeboats and life preservers must be carried on crossing streams 25 feet wide; parachutes and rubber heels are necessary over any trestle more than 25 feet in height."

DID YOU EVER NOTICE?

Did you ever pause in a post office long enough to take a sign at the floor shortly after a number of people have received their mail? If you have you were probably struck by the number of circulars, form letters and hand bills that litter it up. In truth, you doubtless were impressed with the fact that many of them had been thrown on the floor as soon as they were removed from the envelopes, the recipients not even taking the trouble to give them a second glance. But did you ever notice that you didn't see anyone throwing the newspapers, and especially the home-town paper, in the waste basket or on the floor.

Well, right there is a mighty good argument in favor of advertising in the newspapers. The home-town paper goes into the home. Remember this and spend your advertising money accordingly.

A WORTHY IDEAL

Each individual has his ideals, things that he desires to accomplish in this life. He is actuated to work for the accomplishment of his ideal in his chosen field of thought, and he is successful to the degree of energy which he applies. Early in life a man should be possessed with a high ideal to accomplish some good for himself and his fellow man, and work for its attainment. This is the worthwhile ideal of the human mind. —Eckhaug.

PUBLISHERS' TROUBLES.

Canadian newspapers have had a hard struggle to exist during the past two years, and many have been compelled to give up the fight. No publisher makes money out of his subscription list and if a subscriber of a weekly newspaper would have every copy he receives during the year and weigh the paper, he would find on investigation that he has paid the publisher just about what the paper cost before it was printed. Now comes an extra burden on the publisher and he will have to pay double the surtax on paper that he formerly paid. It simply means that many papers will be cut down in size. Furthermore, all newspapers have felt most keenly the depression in the loss of foreign advertising, for when large industries are compelled to curtail because there is no special demand, their advertisements are withdrawn, and advertising is the only source of revenue to the newspaper. The hundreds of subscribers who are in arrears will help the publisher by the small amount of their subscription.—Exchange.

SEVEN MISTAKES OF MAN

1. The delusion that individual advancement is made by cursing others down.
2. The tendency to worry about things that cannot be changed or corrected.
3. Insisting that a thing is impossible because we ourselves cannot accomplish it.
4. Refusing to set aside trivial preferences in order that important things may be accomplished.
5. Neglecting development and refinement of the mind by not acquiring the habit of reading.
6. Attempting to compel other persons to believe and live as we do.
7. The failure to establish the habit of saving money.—Exchange.

"NEW-FUN-LAND"

Montreal, July 3.—On the liner Lady Somers, coming up the St. Lawrence recently, newspapermen learned from good authority how to pronounce "Newfoundland".

Granted that the people who live there have a right to determine the pronunciation, and that Lady Osterbridge, wife of Sir Joseph Osterbridge, after 40 years residence in Newfoundland, is an authority, the way to pronounce it is: "new-fun-land" with all the stress on the "land".

WORLD'S GRAIN EXHIBITION
BITION AND CONFERENCE

The greatest 'vaudeville show' ever staged in the open in Western Canada has been assembled for Regina's World's Grain Exhibition and Conference opening July 24. Artists from Europe, America, China, Japan and Canada have been secured by the committee in charge of entertainment to provide pleasure for the visitors to the exhibition. Many headlines in the world of vaudeville will be on the bill, while leading operatic singers and radio favorites will also be featured.

The revue "The Bird of Paradise", which created a sensation on the continent of Europe, will be the leading spectacle among a stellar number of grandstand attractions. To the strains of dramatic music, girls, beautifully gowned, with graceful movements will depict some of the latest New York, Paris and London dance creations. This is the most tuneful, most lavish, and most magnificent production which has ever been staged at any exhibition.

It is a medley of inspiring melody, matchless dancing, clever specialties, hilarious comedy and imported novelties.

Everything is in readiness for the opening of the World's Grain Exhibition and Conference on July 24. The world's greatest cereal growers have sent their entries seeking the crown of honor as the best grain producers in the universe, live stock exhibits from all over the North American continent, and the greatest of educational and entertainment exhibits ever staged in Western Canada will be on view in the World's Grain Exhibition building.

While the education aspect of the exhibition will be the greatest ever staged, the same can be said for the entertainment to be presented during the 14 days the exhibition will run. Horse racing, both running and harness races, with the greatest thoroughbreds in Canada competing, auto racing, with some of the best dirt track drivers in America and Canada providing the thrills.

HERE'S A FISH STORY, FOLKS.

We understand Hughie Manson went fishing the other day and caught a large steel-head. He drew the entrails and wrapped it in cellophane, he then caught another smaller fish, which he also dressed and wrapped it in the same cellophane, with a sheet of it between the two fish, and put them in his back pocket. Hughie says he stopped to talk to another gentleman close by, then went back to fish.

While fishing he noticed a piece of cellophane paper floating down the river, feeling in his back pocket he found the big fish had disappeared.

He looked around for about half an hour and finally discovered it washing up at his feet in the river. Hughie claims the fish was still alive in his pocket after being dressed for about fifteen minutes, and had jumped out. Hughie also claims he was not drunk, believe it or not!

THE VANISHING HITCH-HIKER

"It's fun to be fooled—it's more fun to know." That's the way certain motorists around Kitchener, Ontario, feel about the mysterious hitch-hiker who has a habit of vanishing from speeding cars. Hair standing on end, three separate motorists swore it happened, then a Kitchener lawyer told the tale. He had picked up an old hiker with a patriarchal beard.

"Well," the driver said, after a while, "times are pretty tough on you, eh?"

"They are," came a voice from the back seat, "but the depression's over, mark my words. It ended on June the 7th."

The driver chuckled. "You seem to know." No answer from the rear seat. "I say," repeated the driver in a louder tone, "you seem to know."

Still no reply. The driver looked around. The rear seat was empty.

Canada And Its Foreign Born

Because of the many uninformative and therefore inaccurate statements frequently heard to the effect that the population of the three prairie provinces of Canada are largely of foreign birth, a recent census bulletin issued from Ottawa, and based on the last census (1931), is of interest and value.

It is revealed that out of a total population of 2,353,529 in the three provinces, 1,808,574 are of British birth, and 544,955 of foreign birth, and of those born under the British flag no less than 1,492,657 were born in Canada.

But, it is frequently argued, these figures do not give a true picture of the racial division of our Western population inasmuch as many of those born in Canada were born of parents who themselves were foreign born and their children, although born in Canada, are, to all intents and purposes, the same as if born in foreign lands. While in many cases, probably most cases, this assumption is not a sound one, the census bulletin recently issued is of particular value in that it classifies the percentage of those who are.

It is shown that the population of the three Western provinces having both parents born in Canada numbers 550,456; having both parents British born outside of Canada 517,403; having one parent Canadian born and the other British born 145,176. That is, 1,213,035 or more than one-half of the total population are at least second generation Canadian or British born. To these may be added another 191,509 where one parent is either Canadian born or British born, while the other is foreign born.

Contrasted with this is the population born of parents both of whom were foreign born. Their number for the three provinces is 945,725. Subtracting, therefore, the total foreign born of 544,955 from this figure, we find that the number born under the British flag, and mainly in Canada, of foreign born parents is only 400,770. These are first generation Canadians.

The figures are not only interesting but reassuring to those who are anxious that Canadian and British blood, customs and ideals shall predominate in this land. Another reassuring and gratifying fact is indicated by the figures that 191,509 of the population in these three provinces are the offspring of marriages contracted between Canadian born or British born men and women on the one hand with foreign born on the other hand. This inter-marriage between the races is bringing about the development of a distinctly Western type of Canadian, and one that gives promise of being a fine type, physically strong, mentally alert, unflinching in themselves the Anglo-Saxon love of liberty, respect for law and authority, capable in government, with the love of music, poetry, art, and handicrafts which characterizes the peoples of continental Europe.

Coincident with the publication of this recent census bulletin, Hon. C. H. Cahoon, Secretary of State at Ottawa, issued a warning to judges within whose jurisdiction falls the duty of naturalization of aliens to exercise care in the performance of such duties. He drew attention to the danger of certain malcontents applying for naturalization solely in order to protect themselves from the danger of deportation, or, in other words, seeking Canadian citizenship not out of love for Canada, or to advance Canadian interests, but in order to secure for themselves greater freedom in undermining Canadian laws and institutions.

And a Saskatchewan judge, commenting on the same subject, is reported in the daily press as urging the Federal Government to see to it that applicants for naturalization are supplied with literature which will enable them to learn something about Canada. Some assistance, he said, should be given to those who wish to become Canadian citizens.

Canada has probably been somewhat careless in the freedom with which citizenship has been conferred upon alien residents in the past, and negligent of its duty to these people. All too frequently naturalization has been obtained solely in order that patent to homesteaded lands could be secured. Other thousands have taken out citizenship papers in order that they may vote, but possibly without any very intelligent idea of what the duties of true Canadian citizenship really involve.

Five years residence in Canada will not in itself make a Canadian citizen. Ability to read and to write does not in itself constitute intelligent citizenship. The mere possession of naturalization papers, while it does make a man or woman a citizen in the eyes of the law, does not necessarily make such person a citizen of Canada in the true meaning of the word "citizen."

It should be a matter of national policy to inculcate right ideas and high ideals in the minds of all who would become citizens. To that end it would seem that something more is required than so many years residence and the taking of the oath of allegiance on the one hand, and the handing over of a piece of official paper by the Government on the other hand. There should be some formal ceremony at which the vital significance of becoming a citizen of Canada would be emphasized.

We believe these new citizens would themselves welcome some such procedure. The vast majority of them have acquired a real love for Canada. They adopted it as home, and desire to make it that not only for themselves but for their descendants. They are anxious to serve Canada, to make it better and grander. They would like advice, inspiration and guidance. The State should provide it.

Japan's Pearl Crop

Planting Of 40,000 Acres Of Waters Largest In Years

The pearl plantings in Japan this year, in contrast to most crops, will be the largest in years. More than 40,000 acres of quiet waters have been sown with more than 3,000,000 pearl oysters, and thousands of people are employed. The pearl crop being planted now will not be harvested for seven years.

Millions of seed pearls or tiny bits of mother of pearl, are skillfully inserted into living oysters for the pearl crop. The oysters slowly proceed to cover these irritants with a secretion which transforms them into pearls. The oysters are placed in steel cages and suspended a few feet above the floor of the sea from great rafts. Twice a year they are brought to the surface, cleaned and treated, to prevent disease. Some 60 per cent of the oysters bear fruit, but only about five per cent are marketable.

The annual crop is valued at several million dollars.

Declares War On Slums

Great Britain Starts Five-Year Drive Against Hotbeds Of Disease

Great Britain has declared a five-year war to the finish on her slums. Tumbledown alley dwellings, basement caves and insanitary "back-to-backs"—hotbeds of tuberculosis, rheumatism, anemia and other diseases—are slated to be wiped out.

The government's move against the plague spots as motivated by the prevailing low building costs and low rates of interest on money, together with a desire to ease the pinch of unemployment.

To insure immediate action the minister of health has called upon all housing authorities in England and Wales to submit by Sept. 30 a series of programs drawn on the basis of clearing all such areas by 1935.

Each program is to include a list of the areas in each locality, the number of houses to be demolished, the number of inhabitants affected, a list of areas where improvement by reconditioning is necessary and time tables for complete clearance, improvement and rehousing of the displaced dwellers.

"The time limit is the very essence of this program," says Sir Edward Hilton Young, Minister of Health. "The time limit must, of course, give reasonable time for the work, but it must be fixed, and fixed absolutely."

No one knows the complete extent of the slum problem in the land, though the estimate generally given is that 1,000,000 dwellings must go to make room for the programs from every area.

An up-to-date picture, however, will be available by Sept. 30, the deadline for the program from every area.

The great mass of the slum dwellings is more than a century old, harking back to the era of quick industrialization of the country when houses sprang up like mushrooms around the factories.

But the problem is not limited to the cities, unhealthy conditions flourish in many villages and these, too, are on the books for destruction. Among cities, the slum evil is general and is regarded as being at its worst in the industrial and mining areas. Liverpool, Manchester, Birmingham, Leeds, Bristol, Hull, Sheffield and scores of other cities have sordid, insanitary sections.

London, because of the great population crammed into a relatively small area, presents a problem of its own and it is believed that the five-year grace period may have to be lengthened for abolition of the sore spots.

In the wake of the government's determination on action, a lively campaign is being pursued by the press to keep the spirit for wholesale and immediate reform at high pitch. The Archbishop of Canterbury and York have penned vigorous appeals and the Prince of Wales who knows great areas of the slums by periodic visits has voiced the support of the royal family.

Latest Soil Thief

"Snowdrift Erosion" Lowers Wheat Yield According To Report

The latest soil thief to be reported by the Department of Agriculture, occurring principally in the North-west the erosion is reported to have lowered wheat yields in that section. For a wheat crop, says Government experts, it is the erosion in connection to furrows, land in the fall and crop it the next spring. The trouble comes because the snowdrifts form on leeward slopes in winter and at the spring melting carry away the loose, recently ploughed soil. The phenomena is worst on northern slopes because the drifts are deepest there and the soil is not frozen when snow on top melts away.

Boycott Severs Trade Relations Between Latvia and Germany

That great German Reich and the very small republic of Latvia are indulging in a certain kind of war. Each has established an embargo on all imports from the other.

It began very unofficially when certain Latvian citizens decided to boycott German goods and German merchants as a protest against Hitlerism. Germany took official notice by barring Latvian butter. Latvia took the next step, a very official one, by barring all imports from Germany; and Germany made the thing complete by putting up bars against all Latvian goods.

At first glance it appears that little Latvia must be the greater sufferer. Her exports are almost wholly agricultural, and Germany has been her best customer. But on the other hand Latvia imports nearly all her manufactured necessities, and in the past has purchased most of them in Germany.

Neither nation is likely to suffer very seriously but Germany will really lose more than Latvia. The German gesture of brow-beating a small state for the offense of an unofficial boycott is similar in principle to the Japanese "punishment" of Shanghai for boycotting Japanese goods. It is far from heroic.

Five Years Without Rain

People Of Shensi, China, Are Dying Of Starvation

Farmers who cry for more rain although it may have been only a matter of days or weeks since there was a downpour, should be thankful the chances of death did not bring them into the world in the province of Shensi, China. There, there has been no rain for five years. Normally, it is a fertile land, one of the richest agricultural territories in the country, and peopled by men and women of fine physique and steady industry.

Today they are starving. They have no crops or live stock to speak of. They have died by tens of thousands of starvation. They live remote from railways and other means of transport and from ordinary communications. They have suffered and died in silence in the hinterland of a country that is almost too vast to comprehend.

Five years without rain! Think of that. We're not so ill off after all.—St. Thomas Times-Journal.

Outlay Not Only Thing

Much More Goes Into Making and Keeping a Home

Everything worth while costs something, although there may be no label on it. A home costs something. First of all, the house and furnishings mean a big outlay. Then there is love, forbearance, helpfulness, and sacrifice—things that make a house a home. When we consider the cost of a home, how careful we ought to be not to do anything that would interfere with its happiness. Nor should we think only of our own home; are we not also responsible for the well-being of the homes of others?

Combating Disease

Death Rate From Diphtheria Is Lowered In Manitoba

Ten years ago the diphtheria death rate in Manitoba was 21.5 per 100,000, which meant that 150 children lost their lives in this province every year from this preventable disease. In 1923 immunization was started in Winnipeg, with the result that by 1929 the death rate for the whole province had been brought down to 10.3. In that year immunization was extended to parts of rural Manitoba, resulting in a further reduction of death rate to 5.2. In rural Manitoba since 1930 there have been 63 deaths in unimmunized territory and only 18 deaths in the much larger population of the immunized territory. There have been no deaths among immunized persons.—Winnipeg Tribune.

Wages Being Increased

New Westminster Lumber Mill Also Employing More Men

An increase of 10 per cent. in wages, affecting 750 men, has gone into effect at the Fraser Mills plant, the Western Lumber Co. Ltd., New Westminster, B.C.

The increase follows a better demand for lumber and an increase in price. The Fraser Mills plant is turning out a quarter of a million feet of lumber daily and the shingle mill is working double shift. Employment at the plant has increased from about 450 men to 750 since last winter.

While the bulk of lumber shipments are still going by ship cargo, the demand for rail shipments is increasing.

A Comfortable Margin

Population Of New York Nearly Million Behind London

The population of New York City according to a census by the New York Merchants Association is now 7,218,000. This still leaves London the world's greatest city by a comfortable margin, its 1932 census showing a population of 8,202,515. Next to New York comes Berlin, with over 4,000,000, then Chicago with 3,376,000. There are eight cities in the world with a population of more than 2,000,000, and thirty-one with more than 1,000,000.

Commission To Handle Wheat

Bucharest, Roumania.—The Roumanian government has decided to set up a purchasing commission to ensure a remunerative return to its wheat farmers by buying large amounts of the cereal at a price fixed by the administration.

INDIAN POLICY IS DEFENDED BY BALDWIN

London, Eng.—Die-hard Conservatives met over-whelming defeat in their attack on the government's Indian policy at a specially convened meeting of the central Conservative council. More than 1,000 members attended.

Led by Winston Churchill, Lord Carson and Lord Lloyd, former governor of Bombay, the die-hard faction presented a resolution expressing "grave anxiety" over the administration's proposals for the government of India, but this met with a noisy reception. An amendment was finally adopted by a vote of 838 to 250 postponing any final conclusion on the question until the joint select committee on India made its recommendations.

Stanley Baldwin, lord president of the council, defended the government's proposals. He was given a great reception. Some time ago it was stated Mr. Baldwin would stake his leadership of the party on the verdict of the gathering and his decision to participate invested the meeting with first-class importance.

He alluded to his reluctance to bring great important issues into the party arena, but emphasized, that regardless of rumors to the contrary, the white paper issued by government and embodying its plans for India, had the support of the entire cabinet. Winston Churchill, who accused Mr. Baldwin of inconsistency, was subjected to considerable interruption while Lord Carson, leaning heavily on his stick and evidently in pain, was given a wonderful reception.

Boat Rates For Wheat Low

Two Cents Per Bushel From Lakehead To Montreal

Ottawa, Ont.—The battle among the lake shipping interests is a factor in the present improved wheat situation, according to word reaching the government department here. Boats are carrying wheat from the head of the lakes to Montreal at as low as two cents a bushel. This is the lowest rate statistical officials here can recall. Last fall the price was around 6½ cents.

During last session an amendment was made to the bill now limiting the business from the head of the lakes to Montreal to British owned ships, but it will only be brought into effect by proclamation and it is intimated here this will be delayed at least until Premier R. B. Bennett returns. Ocean rates are also down.

Unexplored Regions Are Objective Of Lincoln Ellsworth

New York.—Lincoln Ellsworth told the Metropolitan club he had abandoned a summer visit to Sweden in order to have more time for his south polar expedition plans and would depart soon for New Zealand. In New Zealand he will undergo a final conditioning period for an early fall start on the project that has the unexplored regions beyond the bay of Wales and the Fitcher ice shelf as its objective.

Unemployed Make Trouble

Vancouver, B.C.—A crowd of about 150 men broke into the unemployment relief office at Hamilton Hall, overturned registration files, tore out telephone connections, and fled before police could reach the scene. Practically all records of single unemployed relief cases were scrambled so that several days will be required to sort them out.

Island Disappears

Tokyo, Japan.—Ganges Island, shown on maps of the Pacific Ocean at 30.57 degrees north latitude, 154.10 degrees east longitude, has disappeared, according to Japanese naval surveys who have just completed an extensive hydrographic cruise.

Ottawa, Ont.—The Dominion Government will be represented at the informal welcome to President Franklin D. Roosevelt, at Campo-Bello Island, N.B., by Hon. Murray Macdonald, Minister of Pensions and National Health.

Decides Not To Resign

Winnipeg, Man.—Hon. Albert Praeger, former minister of agriculture in the Manitoba Government and at present minister without portfolio, has decided not to resign his seat in the legislature or his position in the government.

Relief From Drouth

Rains Over Wide Areas Greatly Relieve Situation

Ottawa, Ont.—At least temporary relief from drouth was provided over wide areas in the prairie provinces by rains during the past week. This was rendered more effective by moderate temperatures, according to the weekly telegraphic crop report issued by the Dominion Bureau of Statistics. The serious dangers from grasshoppers is emphasized.

"Drouth has had a damaging effect on crop growth across the southern part of Canada from eastern Quebec to the Rockies. Heavy rainfall has greatly improved conditions in the Maritime provinces. Drouth prevails throughout Quebec, with growth of all crops retarded. Rain is urgently needed. Similar conditions prevail in Ontario, where the dry weather has adversely affected nearly all crops."

Grain producers in the prairie provinces are encountering many trials, particularly drouth, heat, hail, insects and disease. Grasshoppers are becoming migratory and seriously threaten the crops over large southern areas of the three provinces.

Root-rot has accentuated the damage from drouth in Saskatchewan. During the past week, there were good rains in northern and central districts of the prairies which either maintained or improved prospects, but further general precipitation is necessary.

British Columbia reports are much more optimistic as a result of the clear, warm weather of the past fortnight.

Renewed Confidence

Advances In Commodity Prices Is Augury Of Better Times

Calgary, Alberta.—Recent advances in commodity prices were lauded by Premier J. E. Brownlee of Alberta to the renewed confidence of salaries and women in the security of their jobs.

In Calgary attending the annual convention of the Union of Alberta Municipalities, the premier took time to express confidence in the early return of better economic conditions which he said was already evident.

"Thousands of our Canadian people are on salaries. When they lose confidence they do not spend freely. When they are confident, they do spend. I think the reserves which have been built up in recent years by the salaries people are now beginning to open and that this influence will be felt throughout the Dominion for the better," he said.

Explaining a reference to a construction program, Mr. Brownlee said the government was now conducting a survey of useful public works which might be done in the province.

"The whole question of work which the government is now considering will be to increase accommodation in various provincial institutions," he said. "If we can find the money, such work may just provide the impetus needed to open up business again in the west."

Will Protect Farmers From Crop Seizures

Saskatchewan Debt Adjustment Commission Considers Plan

Regina, Sask.—Plans for the protection of farmers against undue pressure from creditors have been completed by the Saskatchewan Debt Adjustment commission.

After farmers who adopt the plan laid down by the board have filled in the necessary form provided the board will arrange:

- (1) That no seizure of the crop will be made by sheriffs to pay off judgments, etc.
- (2) That creditors will not be allowed to seize.
- (3) That farm implements will not be seized.
- (4) That title to land will not pass to the tax sale purchaser.

An outline of this plan is being forwarded to farmers in Saskatchewan by the debt adjustment board in the form of a circular letter.

U.S. Wheat Tax

Washington.—Administrators of the United States Farm Act plan to levy a 30-cent a bushel processing tax on wheat, despite the recent sharp rise in grain prices. The administrators hope to place the levy into effect early next month, probably July 8.

Victim Of Heart Disease

Toronto, Ont.—Major General W. B. Lindsay, who commanded the Royal Canadian Engineers at the battle of Vimy Ridge in the Great War, was found dead at the Toronto Hunt Club, apparently a victim of heart disease.

GENERAL STRIKE THREATENED BY RAILWAY MEN

Ottawa, Ont.—A general strike of Canadian railway running trades loomed as a possibility following a deadlock reached by railway and union officials over the proposed 20 per cent. wage reduction.

A meeting here with Hon. W. A. Gordon, Minister of Labor, as chairman, at which the proposed wage reduction was discussed by company officials and representatives of the men, ended in a deadlock. Union officers then took under advisement asking their 24,000 members whether to call a general strike.

Five groups of railway workers were involved in the dispute—engineers, firemen, conductors, trainmen and telegraphers. In the background lay the possibility of a strike by all organized railwaymen in Canada. On June 15, the Canadian National and Canadian Pacific railways served notice on all employees other than the five groups mentioned, they too must accept a 20 per cent. reduction in basic rates. It was believed likely that any strike engineered by the five main groups would be joined by the others, including shopmen and trackmen.

The running trades were asked by the railway managements to accept a 20 per cent. reduction from basic rates. The men already have told the railways they will agree to continue the 10 per cent. cut which has been in operation some months.

One of the arguments used by the men was that a 20 per cent. reduction would mean Canadian railwaymen would be working at rates 17½ per cent. lower than those prevailing in the United States.

Because of the different constitutions of the five unions represented at the conference, it was necessary to secure the authority to submit a strike-bill in various ways. Immediate steps were taken at the break-up of the conference to secure this authority and the delegates said there would be no difficulty.

The engineers were represented at the conference by R. H. Cobb, Toronto; the firemen by H. H. Lynch, Ottawa; the trainmen by Senator James Murdoch, Ottawa; conductors by Charles Montiel, Montreal; and the telegraphers by W. H. Phillp, Winnipeg. In addition, 22 general chairmen from the Atlantic to the Pacific were present.

The Canadian Pacific was represented by Grant Hill, vice-president, and George Hall, manager of the department of personnel. Representing the Canadian National were President S. J. Hungerford and Vice-President A. J. Hills.

PUTTING THEIR HEADS TOGETHER

The camera caught Premier Ramsay MacDonald (left) and Cordell Hull, United States Secretary of State (right) in this unusual tête-à-tête pose during a dinner for the delegates at Governor House recently. Apparently the statesmen are exchanging views "off the record." Premier MacDonald is Chairman of the World Economic Conference and Mr. Hull is the chief delegate from the United States.

Resigns From Cabinet

Hon. R. W. Bruhn Steps Out Of B.C. Government

Victoria, B.C.—Hon. R. W. Bruhn, Minister of Public Works, stepped out of the British Columbia Government, the fifth minister to resign from Premier S. F. Tolmie's cabinet since May 31. Three ministers, N. S. Lougheed, W. C. Shelly and William Atkinson, retired in connection with the cabinet reduction on that date while W. A. McKenzie left in protest against the government's irrigation policy.

In a letter to the premier, Mr. Bruhn recounted his stand in favor of union government "more than a year ago," his gratification when Mr. Tolmie announced his intention of forming such an administration, but his present belief that "no real union has been formed, nor do I see any prospect of your being able to form one." He sent expressions of "highest personal esteem."

"The life of the legislature ends on August 31. No election date has been set. Some 65 candidates have been nominated under the various banners of Tolmie Unionist, Bowser Non-Partisan, Liberal, Canadian Co-Operative Commonwealth Federation and various other parties. Many others have declared their intention to run and the electors are promised long ballots with a wide range of political opinion from which to choose on election day."

On Rotary Directorate

Boston.—John J. Allen, mayor of Ottawa, was nominated by the Canadian-Newfoundland delegation to Rotary International as a candidate to fill one of the five vacancies on the Rotary directorate. The annual report of Chesley R. Perry, secretary, showed a membership of slightly more than 147,000 distributed among 3,600 clubs.

Canada's War Memorial

Ottawa, Ont.—Canada's national war memorial is being altered in accordance with suggestions of the Prime Minister. The memorial stood in Hyde Park, London, England, about a year but has been taken to the March Bazaar studio for changing. When completed the memorial will be brought to Ottawa, although a site has yet to be definitely selected.

Alberta Grasshopper Menace

Province Said To Be Facing A Serious Situation

Edmonton, Alberta.—As the result of a very serious situation which has arisen in the southern areas of this province in the past two weeks, owing to the very hot, dry spell of weather, the provincial department of agriculture is facing the most severe grasshopper fight in the history of the province. Hon. George Hoadley, Minister of Agriculture, said recently.

The hopper situation is much more serious than that which developed in 1922 which held the previous records in such campaigns.

With plenty of poison bait materials on hand, the organization in charge of the campaign has the situation well in hand, in spite of the large area affected, and thus far the actual damage by the hoppers is comparatively small.

Army Of Workers

Ten Thousand Men Now Employed In Government Camps

Ottawa, Ont.—The number of single men now employed in government camps throughout Canada has reached 10,000, according to figures of the Department of Labor. These include those working under the direction of the Department of National Defence. The number is steadily increasing as the various projects develop. The work of the national defence includes improvements of various militia camps, highway construction and landing fields for aeroplanes.

RAPID RISE IN PRICE OF WHEAT SAVES SITUATION

London, Eng.—A combination of blunt words and what Prime Minister R. B. Bennett of Canada, called "an act of God"—a boom in the wheat market—saved the efforts to obtain an international agreement for wheat acreage restriction from a breakdown.

The wheat situation seemed to be taking care of itself nicely for the time being and it was agreed the conference of the four biggest wheat exporters—Canada, United States, Australia and Argentina—could well afford to wait for a brief space until the Australian situation is cleared up.

The blunt words were spoken early in the day, which teemed with dramatic developments, after Stanley Bruce of Australia had told the other delegates that the principal Australian states were firmly opposed to restriction and this made Australian adherence appear hopeless.

Other elegants countered with words to the effect Australia must fall into line sooner or later, and the sooner the better. The nearly 500,000,000 bushel surplus of Canada and United States was mentioned. It was intimated it has got to be disposed of somehow and if no agreement was reached there might be no other alternative than to put it on the market for what it will bring. The actual word "dump" was used by one of the Americans and it was said to have created a deep impression.

What Prime Minister Bennett called "an act of God, providence or may be Roosevelt," made its force felt when Prime Minister Ramsay MacDonald, chairman of the world economic conference took a hand. Perturbed over the near breakdown, he called Premier Bennett, Henry Morgenthau, Sr., of the U.S., Mr. Bruce and Thomas A. Le Breton, of the Argentine, into conference.

In Canadian circles indeed the view is taken there is no call for undue anxiety. While the abnormal carryover remains, one of the great problems for action, crop reports coupled with the extraordinary rise in wheat prices, have introduced new factors which should be borne in mind.

When he received information concerning the rise in the price of wheat on world markets, presumably because of adverse crop reports, Mr. MacDonald professed satisfaction with the progress of the negotiations.

"Experience has shown that a year's crop cannot be estimated accurately until July 7 to July 15," one of those who attended the MacDonald meeting said. "Then it may not be so necessary to take such drastic steps as originally contemplated, and it is hardly likely that a move will be made in that direction until about that time."

Threat of chaos and price debates which will follow if the Canadian and United States wheat surplus of 500,000,000 bushels is "dumped" on world markets, presumably because of adverse crop reports, Mr. MacDonald professed satisfaction with the progress of the negotiations.

FRANCE MAY BE FORCED OFF THE GOLD STANDARD

Paris, France.—Financial experts said that the battle of the franc is lost and it is only a question of time until France will be obliged to devalue the franc.

Telephone conversations between Premier Edouard Deladier and Finance Minister Georges Bonnet, who is at the London conference, are said to have revealed that hope has been abandoned of Great Britain's stabilizing with Europe.

Economic forces either will push France off gold or compel the cheapening of the franc, probably a fourth or a fifth, to meet U.S. dollar competition, financial experts said.

"It is wiser to act now," declared a source conversant with the views of the government, "but the public must be educated."

Nothing except the "miracle" of high dollar stabilization can save the franc, it was said, because diminution of foreign trade will henceforth be accelerated as receipts diminish and the budget deficit grows, compelling the government to inflate to get money as the treasury already is almost empty.

If parliament and the people were awake to the danger devaluation could be effected with less suffering, it was said, than the one now so thoroughly imbued with the idea of maintaining gold to make the franc safe that the government would be immediately overthrown if its value were changed now.

Gold Standard Debate

Rise In Commodity Prices Is More Encouraging Factor

London, Eng.—While the forces are gathering behind the scenes of the world economic conference for a renewed struggle over the gold standard, a new spirit is entering world trade.

Continued rise in commodity prices gives impetus to the belief the tide has turned at last. Dollar wheat at Chicago with reports of small crops, both in Canada and United States, eased the situation which a setback in negotiations to limit production had made increasingly difficult.

For some days increasing pressure has been brought to bear on the United Kingdom's delegation to link sterling with the gold countries and stabilize without the American dollar, which the United States flatly refused to stabilize at this time for fear of the effects on their internal price-raising program.

The British have stoutly resisted this proposal on the double ground that it would be unwise to do so until the U.S. was ready to stabilize, and until they know what is going to happen to the un-pegged American dollar.

Recently it was made known in high quarters that the British had absolutely refused to put it on the market for what it will bring. The actual word "dump" was used by one of the Americans and it was said to have created a deep impression.

What Prime Minister Bennett called "an act of God, providence or may be Roosevelt," made its force felt when Prime Minister Ramsay MacDonald, chairman of the world economic conference took a hand. Perturbed over the near breakdown, he called Premier Bennett, Henry Morgenthau, Sr., of the U.S., Mr. Bruce and Thomas A. Le Breton, of the Argentine, into conference.

Mourn Treaty Of Versailles

Hitler Regime Responsible For Observance Of Anniversaries

Berlin, Germany.—All German went into mourning July 28 in protest against the treaty of Versailles, signed 14 years ago by representatives of the allied powers and Germany.

The new regime Chancellor Adolf Hitler, which moved closer to complete domination of the national scene with the dissolution of the Nationalist party and its affiliates, is responsible for the first observance of the anniversary.

Flags were flown at half mast from churches, public buildings and homes. The signing of the post-war treaty was the theme of school exercises. Thousands of demonstrations were planned. The Berlin Protestant cathedral announced a solemn prayer service on the theme "God bless us all."

All newspapers devoted editorials to the pact, which provided for changes in Germany's boundaries on the south, north and east; for the ceding of all Germany's overseas colonies to the principal allied powers; and for the limiting of Germany's military, naval and air forces among other matters.
